Writing for ACTSC students: Easy to say, but do?

Presented by Judi Jewinski
April 17, 2015
Judi’s role at the University

- To address the growing concern of co-op employers about workplace communication skills
- To develop strategies for establishing English language competency as a degree requirement, as recommended by the Stubley report (2012)
- To oversee pilot projects to establish best practices
- To establish a cohesive, university-wide approach to development of English language competency, an approach which reflects that this competency requires “continual practice with informed feedback and guidance” (Report, p. 20)
Pilot study in ACTSC (2013 – 2014)

In Fall 2013, 215 Actuarial Science students (179 frosh) completed a 2-draft writing assignment (worth 25%) replacing one of two midterms

- Assignment called for three pieces of writing (3 x 800 words), all with different audiences
- Assignment contrasted business and academic genres (memos vs exam question)
- Three 45-minute extra classes helped students understand requirements and expectations
  - Class 1: assignment debrief
  - Class 2: peer review of Draft 1
  - Class 3: revision checklist before Draft 2
- Students were given a formatted blank to use as a model
- Students were encouraged to attend Writing Centre and Student Success study sessions
The challenge? Marking that’s effective and efficient!

- 4 TAs hired from pool of Actuarial Science graduate students, 1 from English (not Rhetoric)
- Generally confident writers but concerned about ability to identify and label errors
  - Marker training and norming with Centre for Teaching Excellence collaboration meant a focus on revision-oriented feedback, not editing
  - Marker support (>8 hours) was provided during first draft marking with lots of comparison
  - Slight recalibration of grades was needed to ensure consistency across the five markers
Results? First draft

Marked first drafts (hard copies) were returned to students, who received . . .

- formative feedback
- a checklist of recurring errors (content, style, format, mechanics) to watch out for in the final draft
- the schedule of writing centre consultation hours
- a list of online resources for grammar and vocabulary
- access to the writing instructor if needed (<5%)
Results? Second draft

Second drafts were marked online following the same rubric. Students received summative feedback.

Attention to formative feedback weighed in at 50% of final assignment grade. As expected, grades improved considerably!

What we learned . . .

- We don’t need to ask so much of the students!
- There’s real value in formative feedback: virtually every student improved the final draft significantly (as reflected in the markers’ impressions—and the marks)
- On a final draft, students care more about marks than about feedback: <10% opened the 2nd draft feedback box on LEARN
- It’s worth letting the Writing Centre know the expectations of the assignment so that tutors can provide the best support possible
- TAs reported having learned to improve their own writing (4/5 were willing to stay on as TAs)
What we did in W14 and S14 . . .

- Used Turnitin because the same assignment prompts were used
- Reduced the number of pieces of writing from 3 to 2
- Required students to turn in the original marked first draft along with the final draft
- Repeated marker training
- Surveyed the students
### Results this time?

What did the W14 survey \((N=193)\) tell us?

- 89.5% spoke positively about having two drafts instead of one
- 76.2% attended at least one extra class
- 64.5% said they found the assignment checklist very helpful
- 54.7% said they found the marker’s comments very helpful on their first draft
- 47.1% said they found the assignment provided valuable practice
- 45.9% consulted the writing centre at least once
- 32.0% said that reading more would help them write better
- 23.8% said they planned to take a writing course to help them improve
- 14.7% said they’d attend the writing centre for extra help with writing
Spring 2014: Report Writing Practice

- 81 MTHEL 131 graduates from 2013-2014 completed an online technical report writing course in Spring 2014 while on co-op
  - We encouraged them to complete a first draft of their major project to benefit from the feedback that they say they like.
  - 19% did (compared to 11% of the whole class) and fared considerably better

What’s next for ACTSC students?

- Many students will be taking an ENGL or ESL course to complete their English language proficiency requirement (under review)
- ACTSC is continuing to require a two-draft writing assignment in MTHEL 131, now marked by a team of writing professionals supervised by a writing centre instructor
- In 2nd year, STAT 231 will require written answers on midterms and finals (including workshops on how to write such answers)
- Co-op students complete 4 work-term projects and reflections
Students need to keep writing throughout their studies or the improvements we’ve seen won’t be sustained. How we do this is an ongoing challenge. But the Faculty is committed to promoting the notion that COMMUNICATION MATTERS!
