The Centre for Writers invites YOU to weekly, **FREE WORKSHOPS** on the English language!
The Writing Process

Getting started
- Explore the assignment
- Make rough notes
- Pick a tentative topic

Drafting/revising
- Make an appointment at a writing centre; attend a group tutorial
- Get feedback on your draft/revise: work on higher order concerns: structure, argument, organization

Editing
- Work on style and lower order concerns
- Proofread, consult checklist for assignment

Today
The topic of the term paper is to discuss:

• Why can China no longer continue to grow along the past track of relying on exports?

• What would be the new growth engines for China? And how fast would be the new normal growth for China?

• What are the economic, political and social reforms critical for China to maintain sustained strong economic growth in the future?
Genre: fact-based position paper, argumentative-analytic

Length: 4-5 pages (excluding title and references pages, tables and figures)
Abstract: Yes
Value: 30%
Draft Due: Nov. 26th
References: American Psychological Association (APA)
   www.owl.english.purdue.edu/owl/resource/560/01

Headings: ?
• You are expected to recapture what is covered in class lectures.
• You also need to expand the substance of your paper with your own research.
• You need to consult, at least, three additional academic references, especially journal articles and their equivalent.
You are expected to recapture what is covered in **class lectures**.

- **Why can China no longer continue to grow along the past track of relying on exports?**
  - Sept. 5 to October 24

- **What would be the new growth engines for China? And how fast would be the new normal growth for China?**
  - Oct. 20 – Nov. 24

- **What are the economic, political and social reforms critical for China to maintain sustained strong economic growth in the future?**
  - Oct. 20 – Nov. 24
Sources:

- Should **primarily** draw on current **peer-reviewed articles**
  - Journal articles, review articles, published monographs, edited volumes, textbooks, association manuals/guides, etc.

- Other sources?
  - Newspaper articles, op-eds, magazines, unsubstantiated internet articles, etc.
“Individually research a topic and write and submit a paper”

What kind of paper are you being asked to write?

• Look at the verbs:
  • “Describe”
  • “Discuss”
  • “Do you agree or disagree”
  • “Justify your response”
  • “Do you think…why?”
Two aspects to this:
1. Research and **outline an issue**, and
2. **Take a position** based on your research

Approaches:
- **Summarize** issue: what are the relevant aspects?
- **Analyze** the topic/issue: what are the component parts?
- **Extrapolate** from your research: what effects could result from the issue? What are possible outcomes?
- **Synthesize** research: **persuade** audience of your position
The topic of the term paper is to discuss:

• Why can China no longer continue to grow along the past track of relying on exports?
  • What needs to be unpacked here? What questions do you need to answer before you can answer the question?
    • E.g., define “fast track”
    • Summarize history of capitalism with Chinese characteristics
    • What has arisen to block/reduce previous economic growth rates?
• What would be the new growth engines for China? And how fast would be the new normal growth for China?
• What are the economic, political and social reforms critical for China to maintain sustained strong economic growth in the future?
The topic of the term paper is to discuss:

- What would be the new growth engines for China? And how fast would be the new normal growth for China?
  - What is a “growth engine”?
  - What are some “new growth engines”? How many should you include? Why choose these ones rather than others?
  - What would “new normal growth” look like? Why? How would you determine it?

- What are the economic, political and social reforms critical for China to maintain sustained strong economic growth in the future?
The topic of the term paper is to discuss:

• What are the economic, political and social reforms critical for China to maintain sustained strong economic growth in the future?
  • What does “sustained strong economic growth” look like? Is there a model or models for this? Which will you follow?
  • Economic, political, social: need to address all three? How many for each? Remember to support/justify your choices.
Draw on topic description for your structure:

- Introduction: what is the issue, why is it significant? (China’s economic history)
- Body: answers the three questions (three sections)
- Conclusion: review findings, suggest recommendations, extrapolate beyond research
Three potential issues to respond to:
  • Why need for change
  • New models
  • Changes required to implement new models

(Briefly!) summarize your position in the introduction

• First person: “I argue that…. ”?
• Or leave yourself out:

“China cannot continue its present economic growth because X, and must pursue new models of Y by implementing wide-spread changes of Z.”
Must have an explicit position statement that answers the research question.

Position must be: specific
manageable
interesting

Contains an observation, an argument, and (potentially) suggests some implications

Explicitly links your position/claim to your sub-claims/reasons and evidence.

“I argue X because of A, B, and C”
**Order of thesis statement/paper**

- **Claim / Solution**
- **Link (because)**
- **Reason / Analysis**

**Order of tasks**

- **Challenges / Problem**
  - (How, So what, Why?)
- **Evidence**
  - (Case studies, gov’t reports, legal documents, literature reviews, etc.)
Always have a **topic sentence** that explicitly indicates what the paragraph is about, and how it fits in your argument.

Always have a **transition sentence** that connects each chunk of argument to the next:

- use transitional words/phrases
- link back to main claim or sub-claim

How will you draw on your evidence?

• Direct quotation (statistics, clinical findings, etc.)
• Paraphrase
• Summary

Paraphrase & summarize when the ideas are important: content

Quote directly when the rhetoric is important: form

Always indicate when you’re drawing on the ideas of another
• Get feedback from a “trusted reader”
  • Consider using other students in the course or the Centre for Writers
  • Ask readers to read for specific purposes: thesis, structure, transitions, development of a particular paragraph or idea.
• Focus on higher-order concerns before lower-order ones
• Attend a group writing tutorial
Towards the due date, switch your focus from higher-order concerns (arrangement, arguments, evidence) to lower-order concerns: proofreading, grammar, citation format, grammar/spelling.
