

# Join us and Help Change the World

## ENGINEERING OUR NEXT GENERATION The **ENG** FUND

Engineers do work that makes the world a better place and our donors play an important role in making this happen. That's why the Faculty of Engineering created The Engineering our Next Generation Fund – or the ENG Fund – which is the beginning of something truly special.

The **ENG Fund** is a single, large-scale endowment fund that will help our donors be part of the legacy we leave the future. It is designed to make the most out of your gift while building the financial security the faculty needs to keep turning ideas into innovation.

### Maximize your Giving Impact

Donors who give to the ENG Fund feel good knowing their contribution has both an immediate and a long-term impact. That's because when you give to the ENG Fund you're supporting small annual initiatives that nurture students and local talent, while also helping to build the critical mass needed to attract and support world-class research. Your gift makes a difference now and for many years to come.

### Invest in Innovation

Giving to the ENG Fund is investing in innovation on many levels. Your contribution has the potential to advance research, educational programs, student initiatives, scholarships, bursaries, community outreach, and more. It will help build a culture of innovation in Alberta and beyond.

What's more, is the ENG Fund is designed to be flexible and to ensure that opportunities for innovation won't be missed. It allows the faculty to target priority areas that need the support most and though they may vary from year to year, all ENG Fund projects and initiatives are selected based on their potential to contribute to the faculty's legacy of innovation and game-changing initiatives.

### The ENG Fund in Action

In 2018, the faculty identified student projects as a priority and the ENG Fund matched nearly \$100,000 in funds raised by student groups. This developed students' skills in leadership and entrepreneurship, created opportunities for real-world learning, and helped them participate in national and international competitions – experiences that will stay with them for the rest of their lives.

Next year, it will be a new priority but with same big impact.

The ENG Fund is helping the AlbertaSat team launch their second satellite, Ex-Alta 2. Its mission is to gather data to help predict, track, and assess damage from wildfires.

The ENG Fund impacts more than just students. This year, the fund helped the UAlberta Bridges to Prosperity chapter get to Tholamarca, Bolivia, to build a footbridge that will connect a rural community to schools, hospitals, and local businesses.

## Give to the **ENG Fund**
