

## TSP-I 02 – Improving Didactic Teaching Skills

**Co-Directors:** Andrea Davila-Cervantes, MD  
Carol Hodgson, MSc, PhD

**Phone:** 780-492-8397  
**Email:** [davilace@ualberta.ca](mailto:davilace@ualberta.ca)

This course will primarily focus on how to improve the didactic teaching skills of faculty and/or medical trainees. The final product will be a teaching plan that each scholar will present at a special conference-type session.

### By the end of the course, Scholars will be able to...

1. Describe the importance of adult learning in order to understand the processes of learning and teaching
2. Describe the importance of developing positive, welcoming and supportive learning environments to learners, institutions and departments.
3. Discuss the characteristics of a small group, group dynamics, the benefits of teaching and learning in groups, and how to develop a PBL case or a small group case based session.
4. Discuss the cognitive insights into large group teaching, how to conduct large group sessions-preparation, delivery and evaluation.
5. Describe the importance of creating a large group interactive session and the incorporation of technologies to facilitate the attainment of the desired learning outcomes.
6. Develop a teaching plan in the content area including references to indicate the reason the teaching method was used and present a session to the class

TSP-I 02 Schedule	
Date	Topics
Session 1	Course Overview/ Adult learning/ Creating a learning environment
Session 2	Advanced facilitator skills in small groups
Session 3	Teaching and learning in large groups
Session 4	How to make a large group session interactive (audience response system, TBL, flipped classroom)
Session 5	In-class presentation
