OVERVIEW
Our program is for anybody who loves rural medicine! We provide residents with a wide range of skills, enabling them to become well rounded family practitioners. We offer the opportunity for focused skills training, call flexibility, one-on-one learning with specialists, independence and growth, and continuity of care in family practice. All core rotations, academics and elective time have been carefully scheduled to help you become a confident and skilled physician.

Learning Opportunities
Preceptor-based learning - excellent access to clinical cases and one-on-one teaching

Prolonged exposure to rural family medicine ensures a true experience of comprehensive care and continuity of care with a limited panel of patients

Weekly academic rounds on a variety of topics

Monthly academic days cover exam preparation, therapeutics, ethics and guideline review

Workshops on Evidence-Based Medicine (EBM), Behavioral Medicine, Cognitive Behavioural Therapy (CBT), CASTED, Emergency Department Echo (EDE), and critical care simulations (STARS bus simulations)

Life Support Courses: ALARM, CARE (ATLS), NRP and PALS courses are all covered during residency
