OVERVIEW
Shifa Medical Clinic is a full-service family practice with walk-in hours and booked appointments. It is located in South Edmonton just off of Gateway and the Whitemud. Shifa Medical clinic is affiliated with Edmonton Southside PCN, and has a wonderful multidisciplinary team with a full time RN, along with a mental health nurse (BHC), RT and Dietician. They also have access to an exercise therapist and various group programs for patients as well through the PCN main office.

Dr. Kaili Hoffart has been at this clinic since completing her residency in 2014. She has a diverse practice with a focus on women’s health (including lots of IUD insertions/endometrial biopsies and she follows her prenatals up to 26 weeks and then resumes family care at 2 weeks post-partum), lumps and bumps procedures, and chronic pain/safe opioid prescribing. She has a busy practice with a good variety of young families, geriatrics, complex chronic pain patients, and patients with multiple comorbidities.

When away from her family practice, Dr. Hoffart covers PCHT at the Grey Nuns Hospital, Subacute at Capital Care Grandview and does some ER shifts in Drayton Valley.

Dr. Hoffart is passionate about teaching engaged learners and is very involved in family medicine leadership. She presently serves as the Chair of the ACFP First Five Years in Practice Committee.

Learning Opportunities
Residents will have opportunities to learn IUD insertions, chronic pain management and opioid tapering (initiative pending with PCN South regarding Safe Opioid Prescribing), multidisciplinary involvement, specifically close involvement with NP and PCN Resources. There is a portable Mac available for learners and individualized EMR access.
