Faculty of Medicine & Dentistry, University of Alberta

CRITERIA FOR ACADEMIC RANKS, PROMOTIONS AND APPOINTMENTS FOR CLINICAL ACADEMIC COLLEAGUES

I. INTRODUCTION

The Faculty of Medicine & Dentistry, University of Alberta, values its relationship with their clinical academic colleagues (CACs) and recognizes the indispensable contribution they make to the academic mission, especially through the teaching of undergraduate and postgraduate students, and also through clinical research, administration, and service to the profession. They are major providers of care at the teaching hospitals and ambulatory teaching clinics affiliated with the university. The appointment to a clinical rank confers the privilege and responsibility of being a teacher for the University of Alberta. CACs are encouraged to indicate their academic rank in correspondence and on their professional letterheads.

The initial academic rank of new CACs will normally be Clinical Lecturer. However, Department Chairs may consider a higher ranking on a case-by-case basis. It is an expectation that all CACs will meet criteria to be promoted to Assistant Clinical Professor within 1 to 3 years and some may choose to remain at this level for the remainder of their career. Many may aspire to develop their careers in such a way as to attain Associate Clinical Professor (20-30% of faculty), and others full Clinical Professor (5-10% of faculty).

The purpose of this document is to inform CACs at the University of Alberta about the criteria for promotion. The procedures of appointment together with probationary appointments, provision for withdrawal of appointment and Emeritus status are intended to ensure uniformity and fairness as it relates to the honor of holding an academic appointment and being promoted at the University of Alberta.
Definitions and Considerations

For purposes of this document, CACs are defined as individuals associated with the healthcare profession who are or have been primarily employed externally to the University of Alberta and who participate in the teaching and/or research and/or administrative activities of a department in the University without the expectation of compensation. They may be physicians, dentists, PhDs, nurses, pharmacists or even professionals associated with medical teaching (e.g. lawyers, accountants, administrators).

Under this description, a CAC’s primary contribution to the University of Alberta is usually in the form of teaching but may, in some cases, be primarily in research or administration. Teaching, research and administration are recognized as the primary activities in the assessment and ranking process (see “II. DESCRIPTION OF ACADEMIC RANKS” in the following pages). The chairs of departments involved in the evaluation process therefore have the option, in special cases where the contribution is primarily in the area of research or administration, to consider this as the primary criteria. This particularly applies in cases where the CAC has had little opportunity to be engaged with learners or have administrative roles.

A professional who voluntarily chooses to transfer from a salaried / tenured-track position within the University of Alberta to become a CAC will normally keep his/her previous University rank. Similarly, a professional coming into the region from e.g. another region / university joining as a CAC will be considered for initial appointment at his/her previous University rank at the discretion of his/her department chair.

In the exceptional circumstance where a CAC moves to a tenure-track position, the rank will be considered on a case-by-case basis (usually Assistant or Associate Professor without tenure) keeping in mind that a tenured appointment would only take place where an individual had previously attained tenure via a tenure hearing.

Full recruitment policy found in link:
http://www.conman.ualberta.ca/stellent/groups/public/@academic/documents/procedure/pp_cmp_072411.hcsp

For purposes of this document, Department refers to Department and/or stand-alone Division; chair refers to Department chair and/or director of stand-alone Division.
II. DESCRIPTION of ACADEMIC RANKS

A. Clinical Lecturer

1. Is competent in clinical practice and is willing to relate clinical practice to teaching and clinical research.

2. Maintains clinical competence as professionally mandated, including but not exclusive to:
   • a valid license with the College of Physicians and Surgeons of Alberta.
   • privileges granted by Alberta Health Services (AHS) if providing appropriate services within the AHS.

B. Assistant Clinical Professor

1. Has demonstrated growth in capability as a teacher and a professional.

2. Shows sustained effort to facilitate teaching.

3. Has made an effort to learn about different techniques and approaches to teaching.

4. Participates in university, regional and/or provincial professional activities.

5. Has participated in clinical research or has written case reports and review articles in journals.

*Individuals being considered for promotion to Assistant Clinical Professor are expected to have attained criteria #1 plus 2 or more of the other criteria*

C. Associate Clinical Professor

1. Is recognized as an excellent teacher in the Department.

2. Has obtained the reputation of being a highly competent professional.

3. Has developed a special interest and expertise within the field.

4. Has taken an active role in the activities of university, provincial and national professional organizations.

5. Has been invited to speak at medical society meetings, in continuing professional learning programs, and at other institutions.
6. Has publications in clinical research or education as a collaborator or primary investigator and/or has presented at provincial and national clinical education or research meetings.

*Individuals being considered for promotion to Associate Clinical Professor are expected to have attained criteria #1 plus 2 or more of the other criteria*

D. Clinical Professor

1. Has proven to be an enthusiastic, effective and devoted leader in the educational program and an excellent and stimulating teacher.

2. Is recognized by peers as being an outstanding professional who has made significant contributions to the practice of medicine and the improvement of health care delivery.

3. Has been elected to office in leading provincial, national, or international professional organizations.

4. Has performed administrative or policy functions in the university, region or in a professional organization.

5. Has demonstrated scholarship in research as illustrated by publications in peer-reviewed journals, functioning as a referee for scientific or education publications, and/or as a holder of peer-reviewed and other research grants. Has presented clinical, educational, or research findings at national and international meetings.

*Individuals being considered for promotion to Clinical Professor are expected to have attained criteria #1 plus 2 or more of the other criteria*

Under exceptional circumstances, promotion for any rank may be on the basis of performance in research and/or administration

III. GENERAL DESCRIPTION of CRITERIA FOR PROMOTION

A. Teaching

The criteria for competent performance in teaching are applied with increasing stringency as experience and rank increases.

In assessing competence in teaching, evidence may be collected from evaluations completed by students and residents. It is anticipated that peer-to-peer assessments (e.g. POT), once operationalized, will also be incorporated in assessment of teaching competence. Other competency indicators may include the use of innovative and constructive teaching methods and ability to communicate effectively with students and colleagues.
B. Clinical Competence

Basic clinical competence is expected of all physicians on staff. Clinical activities are expected to progress toward excellence as rank increases.

The development of special interests and expertise is important.

The development of new techniques and approaches to clinical medicine will receive high weighting when present.

C. Administration

Administration may include the organization of courses or parts thereof; service on regional, University, or professional organization committees, responsibility for special programs and formal administrative posts.

Leadership positions within organizations (University of Alberta, regional or provincial organizations) will also be evaluated for merit.

D. Research

Clinical research activity as a primary investigator or in collaborative studies, will contribute to a staff member's eligibility for promotion.

The quality of research activity will be assessed on the basis of the stature of journals in which papers are published, the opinion of experts in the field, the extent to which publications are cited in the literature and thorough professional recognition as indicated by invitations to symposia and other meetings.

Basic science research activity is not a requirement for CACs.

Note: Individuals are expected to meet or exceed most criteria but it is recognized that major emphasis may favor one area over another, i.e. teaching vs. research vs. administration.
IV. PROMOTION CHART

<table>
<thead>
<tr>
<th>ASPIRED RANK</th>
<th>THOSE ELIGIBLE</th>
<th>TIME REQUIREMENTS IN PRESENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clinical Professor</td>
<td>Associate Clinical Professor</td>
<td>Normally a minimum of 5-10 years</td>
</tr>
<tr>

<tr>
<td>Assistant Clinical Professor</td>
<td>Clinical Lecturer</td>
<td>Normally a minimum of 1-3 years</td>
</tr>
<tr>
<td>Clinical Lecturer</td>
<td>Probationary Appointment by Department Chair</td>
<td></td>
</tr>
</tbody>
</table>

V. PROMOTION PROCEDURES

1. The Department Chair's office will, on an annual basis, provide all CACs with this document.

2. Annual Reports will be requested from all CACs by the Department Chair at the same time and will form part of the brief for each promotion.

3. The Chair will inform CACs of the Department of the promotion deadlines. These timelines are normally:
   - Notification to the Department Chair of intent to apply for promotion by January 31\textsuperscript{st}
   - Review by the Department Chair by March 31\textsuperscript{st}
   - Recommendation for promotion to be reviewed by the Dean by May 31\textsuperscript{st} (for July implementation)

4. In the case of promotion to Clinical Professor, the individual being considered will provide the Department Chair with the names and addresses of three referees. The Department Chair can then write these individuals, and to others, to obtain additional information. It is not appropriate for the candidate to request a letter directly from the referee.

5. Where the CAC is involved in research in a significant way, then the Departmental research director should have input.

6. The applicant for promotion will provide to the Department Chair all necessary documentation – i.e. Annual Reports, Curriculum Vitae, Teaching Dossier,
names and addresses of referees in the case of promotion to Clinical Professor.

VI. PROBATIONARY PERIOD

Appointment to the rank of Clinical Lecturer is considered probationary with annual reassessment by the individual department.

VII. CONTINUATION OF ACADEMIC APPOINTMENTS

CAC academic appointments may be discontinued by the Department Chair. Withdrawal of a clinical faculty academic appointment may occur on the basis of:

1. Voluntary withdrawal by an individual.
2. Failure to meet the criteria for reappointment as per the appended terms of reference.

Upon cessation of an academic appointment the Department Chair will formally acknowledge past contributions to the Department and to the University.

VIII. APPEAL MECHANISM

The withdrawal of an academic appointment or failure to receive academic promotion, when eligible, may be appealed by the CAC upon 60 days written notice given to the Department Chair.

A Committee will be struck for appeals, comprising the Associate Dean Clinical Faculty as chair, except where potential conflict may arise. In the latter case an alternate chair will be named by the Vice-Dean, Academic Affairs. Two other committee members will be selected from the Clinical Promotion committee from departments other than the appellant’s department under a process directed by the chair. The Committee’s recommendation will be communicated to the Dean for deliberation by Dean’s Council whose decision will be final.

X. EMERITUS APPOINTMENTS

The title of Professor Emeritus recognizes meritorious service to the University of Alberta by an individual professor retiring from the University and recognizes the value the individual has earned with the University.
Emeritus appointments are not automatic. Upon retirement, a CAC whose service is strongly identified with the University of Alberta and deemed worthy of continuing recognition, may be recognized with the title of Professor Emeritus. He/she, at the date of retirement, should have attained the rank of Clinical Professor and should have had at least 10 years of full-time service as a CAC. Teaching record, community service and research will be considered in the decision to grant Professor Emeritus status.

Such recommendation is made by the staff member's Dean to Dean's Council. Dean’s Council will decide each case on its individual merit. Initiation of this process may be by the Department Chair and would require approval of the Department’s Evaluations/Promotions Committee.
