Resources for educating Clinical Teachers:

- The easiest are those ones offered by CTL (Center for Teaching and Learning at U of A): http://www.ctl.ualberta.ca
- The next is the Teaching Scholars Program (Offered by FOMD) - people with an interest in Med Ed are enrolled and their chair must support some protected time to carry out the courses: http://www.med.ualberta.ca/programs/scholarship/tsp
- The last (and most intense) is the Masters of Education Program for Health Sciences Education (Offered at U of A). This one is a true Masters degree and involves a significant work and commitment: http://www.edpsychology.ualberta.ca/graduateprograms/healthscienceseducation.aspx
