MED 514 - Occupational Hygiene (offered jointly with School of Public Health)

This course is an introduction to occupational hygiene theory, principles, and practice. It covers the recognition, evaluation, and control of common occupational health hazards including chemicals, biological agents, physical agents, and ergonomic issues. The course is not designed to prepare hygienists for practice.

May not be taken for credit if credit has already been received in PHS 521 or SPH 521.

Offered jointly by the School of Public Health and the Department of Medicine.

Course is offered starting in 2019.

Prerequisite: Consent of Instructor.

Instructor: Dr. Bernadette Quémerais; e-mail quemerai@ualberta.ca
