Please use and submit this template if your work is at the conceptualization stage or is still in progress with only minimal results and lacking a conclusion.

**TITLE:** in all capital letters and bolded

**Author A, Other B, More C**
Department affiliation – e.g. Department of Obstetrics and Gynecology
Institute affiliation – e.g. Women and Children’s Health Research Institute
University of Alberta

**Objective/Hypothesis:** This section should introduce the background to the work that will be carried out. It should possess a clearly stated hypothesis and/or set of objectives for the study.

**Methods:** This section should specify exactly what will be done experimentally. Sample size and statistical methods used should be indicated.

**Progress:** Any preliminary data collected pertaining to the proposed project should be included. Any anticipated results can also be noted here.

**Discussion and Significance:** This final section should emphasize the impact the future findings of this study will have and should make reference to the purpose of the work outlined in the objective section.

**Funding:** Acknowledge any funding or other support for this work.
