Clinical Research Seminar Series

A monthly seminar series hosted by the Office of Research (FoMD) & NACTRC

Implementation Science

How do we implement evidence to advance practice?

Why does new evidence so often NOT turn into better practice?
Dr. Denise Campbell-Scherer (Associate Professor, Department of Family Medicine & Associate Dean, Physician Learning Program) will reflect on different approaches to implementing evidence.

She will use examples from the literature and her own research to demonstrate how to improve our ability to advance practice.

Thursday, April 5th, 2018

2:00 – 3:00pm
