Advantages of “The MobLab”
The Mobile Clinical Research Laboratory

- Available for community-based research by providing infrastructure and facilities available nowhere else in Canada.

- Enables researchers to:
  - assess diverse and/or remote populations that have previously been inaccessible and, as a result, unstudied
  - recruit nontraditional and underrepresented samples of participants, thereby increasing the generalizability of research findings

- Supports existing and new collaborations and partnerships

- Creates an environment that attracts high-quality trainees and imparts new high-level skills to highly qualified personnel for research

- Feature of the MobLab
  - Flexible work space to respond to new opportunities
  - Collection and processing of biological samples
  - Allows for privacy during clinical examination and testing of participants
  - Wheelchair accessible with washroom facilities
  - Outfitted with a dedicated server and a laptop with printer positioned at private work station where research staff can access the internet and perform data entry and analysis if required

- For more information, contact

Inventory List

In-Built
- Laptop
- Printer
- Fridge (General)
- Medical Freezer (-80 degrees)
- Medical Fridge
- Medical Examination Bed
- Two sound proof examination rooms
- Disposable sharps container
- Centrifuge
- Lavatory with Sink
- Utility Closets (2)
- Fire Extinguishers (2)

External
- DCAT Testing Station
- Neurosensory Analyzer
- Spirometry Unit
- Balance Plate and Dynamic Vision Testing Equipment
- DCA Vantage Analyzer
- Satellite Communications Equipment
