# POSTDOCTORAL POSITION IN DRUG DISCOVERY

## Pharmaceutical Biotechnology

The Faculty of Pharmacy and Pharmaceutical Sciences at the University of Alberta invites applications for one postdoctoral fellow position for research projects on the structure and function of peptides as calcium carriers. Candidates should have good English communication skills and experience in the area of proteomics and inorganic chemistry. Qualifications include; Successful track record documented by publications in high-impact/international peer-reviewed journals; Excellent ability to research, design, and refine project designs; Proficiency in scientific writing and maintaining detailed documentation; High motivation, creativity, and commitment to achieving project goals. The postdoctoral fellow should demonstrate keen interest in assisting and collaborating with graduate students, faculty and other laboratory personnel. Several specific projects are available including: protein purification, enzyme kinetics, functional characterization, and structure determination of calcium binding peptides in humans. Candidates for the position must have a PhD and extensive research experience in drug discovery, protein engineering and cell biology.

Applicants should send a cover letter stating their interests and qualifications, curriculum vitae, and names and contact information of three referees to:

Hoon Sunwoo, MSc, PhD
Associate Professor
