March 20, 2018

Dear Colleagues, Students, Friends, and Family of Dr. Fakhreddin Jamali:

It is with the most heartfelt of congratulations that after 37 years of service to the Faculty of Pharmacy and Pharmaceutical Sciences at the University of Alberta, we announce the retirement of our dedicated friend and colleague, Dr. Fakhreddin “Mo” Jamali.

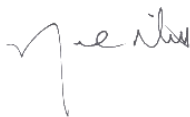

We would like to take this time to thank Dr. Jamali for his dedication to both his career and to the industry; for his contribution to bettering the lives of others through his research and advocacy; and for giving his years and knowledge to his students.

Since his arrival here at the faculty in 1981, he has had a transformative impact both locally and globally, as a teacher, colleague, mentor, and passionate advocate for our profession. As we celebrate his career, and in honour of the significant impact he has had on many of us, we are raising funds to create a graduate fellowship in his name: **The Dr. Mo Jamali Graduate Fellowship in Pharmaceutical Sciences.**

We now invite you – his colleagues, students, friends, and family – to join us in honouring his astounding contributions to pharmacy through your donations to create a graduate fellowship in his honour. With an endowed fellowship, students for years to come will have this fellowship to undertake their research at our faculty, building on the pharmaceutical sciences legacy of Dr. Jamali. Let us gather together to ensure that his legacy, and our gratitude, can be felt for years to come. We have already raised significant funds to make this fellowship a reality. The Faculty will be matching donations made to the fund and we hope to see it become one of our most prestigious graduate student honours to be presented annually, and in perpetuity, at Research Day.

For more information or to make a donation to the Dr. Mo Jamali Graduate Fellowship in Pharmaceutical Sciences, please contact Andrew MacIsaac, Assistant Dean, Advancement, at akmacisa@ualberta.ca or 780-492-8084.

Sincerely,

Dr. Neal Davies, Dean
Faculty of Pharmacy and Pharmaceutical Sciences
