

31ST ANNUAL
JOSEPH R. ROYCE
 PSYCHOLOGY CONFERENCE

ROYCE MAIN EVENT

FRIDAY, MARCH 24

8:45 - 5:30 PM

ECHA LI-190

9:00 AM Invited Address: Dr. Nancy Galambos

**Highlights from the Edmonton Transitions Study:
 The Long & Short of It**

The Edmonton Transitions Study tracked a sample of Class of 1985 high school graduates for 25 years. This presentation will provide an overview of select findings at the intersection of mental health, family, and work, illustrating the value of longitudinal research for understanding developmental pathways from late adolescence to midlife.

2:00 PM Invited Symposium: Chair: Dr. Elena Nicoladis
 Outliers as information

3:45 PM Keynote Address: Dr. Tony Volk, Brock University

Bullying - A Multidisciplinary Viewpoint

Humans have evolved large brains to deal with complex social problems. It is therefore not surprising that bullying is a persistent, complex social problem that has proven challenging to understand. In order to try and study this complex problem I have adopted a multidisciplinary approach that involves evolutionary, cross-cultural, social, and developmental perspectives. I will discuss the value of a multidisciplinary perspective along with the results that I have obtained by combining different disciplinary tools and perspectives.
