Mitacs supports the career development of graduate students and postdoctoral researchers through non-academic research collaborations, professional skills training, and international mobility. We fund research in all disciplines and help you gain the experience to launch your career in academia, industry, or a not-for-profit.

1. Bring your research to a partner organization

- **Mitacs Accelerate** supports collaborative research between grad students and/or postdocs, professors, and companies or not-for-profits
- Stipend starts at $10,000 for each four-month internship
- Professional experience with a partner organization

2. Become a research management leader

- **Mitacs Elevate** offers postdoctoral fellows a two-year professional development plan as they lead a collaborative research project with a company or not-for-profit
- Stipend/salary starts at $50,000 per year, plus customized training valued at $15,000+
- Skills training in project management, leadership, and communication

3. Take your research abroad

- The **Globalink Research Award** provides $5,000–$10,000 for senior undergrads and grad students to undertake research at a university abroad in select partner countries
- The **Globalink Partnership Award** provides $15,000 for grad students to do research with an international company (any location except the United States)

4. Prepare for your career

- **Mitacs Step** offers workshops both on campus and online in professional skills valued by employers
- Grad students and postdoctoral fellows are eligible to attend
- Workshops are free of charge and facilitated by leading industry and business experts

---

**Why Mitacs?**
