

University of Alberta: Postdoctoral Fellow (Clinical Translational and Global Mental Health Research)

The Department of Psychiatry at the University of Alberta in Edmonton is recruiting a postdoctoral fellow in computational psychiatry. The successful applicant will participate in clinical translational, epidemiological and global mental health research. Current and potential projects include e-mental health interventions, task-shifting and peer support interventions and groups exercise for Depression.

Applicants must possess a doctoral degree (MD and/or PhD in psychiatry, psychology or neuroscience and relevant research experience in this area. A strong track record of refereed journal publications is desired. Applicants should have experience working in a team setting and exhibit excellent communication skills (oral and written).

The successful applicant will play a co-leadership role for several research projects in clinical translational and global mental health research, co-develop and participate in preparation of research grant proposals, assist in the supervision and training of other personnel including technologists, graduate students, other lab members and scientific collaborators. The ideal applicant will exhibit a high level of motivation to pursue data-driven research in mental disorders, to publish in excellent peer-reviewed journals, and to seek prestigious fellowships and research awards, as appropriate.

The stipend for this position will be commensurate with the experience of the successful candidate. This position is available immediately and funding is sufficient to support the initial position for at least two years.

Fluency in English is a requirement for this position and for applicants who did not complete training in an accredited English language institution, IELTS scores will normally be required as evidence of proficiency.

The Faculty of Medicine & Dentistry at the University of Alberta is one of Canada's premiere health-sciences institutes, and in recent years has ranked among the top 50 medical schools in the Times Higher Education World University Rankings. The University of Alberta has more than 39,000 students and ranks best places to work in academia. Excellent opportunities exist for collaborative research with other disciplines within the Faculty and University and other Faculties, as well as outside the University.

The University of Alberta is located in Edmonton, a vibrant metropolitan area of 1.8M and the provincial capital for Alberta. This friendly city offers a rich cultural life and diverse recreational opportunities. The campus on which the Faculty of Medicine & Dentistry is located is adjacent to the North Saskatchewan River with one of the largest municipal park systems in North America. Edmonton is approximately 3.5 hours by car from Jasper and from Banff in the Canadian Rockies. www.ualberta.ca/about/facts/fast
