POSTDOCTORAL POSITION IN Gamper Lab

A Postdoctoral position is available in the group of Dr. Armin Gamper in the Department of Oncology, Division of Experimental Oncology at the University of Alberta. The Gamper lab focuses on studying the DNA damage response and the potential to target it for therapeutic purposes, particularly to improve cancer treatment. Techniques in the lab include novel biochemical tools to dissect signaling pathways and cutting edge microscopy (high throughput and high resolution).

The position requires extensive expertise in microscopy. Familiarity with electron microscopy as well as molecular biology and a background in DNA repair and signaling, chromatin, stem cells or signal transduction are a plus. Responsible, dedicated, and self-motivated candidates who got their Ph.D. less than three years ago are encouraged to apply.

To Apply:
Forward your CV and contact information for three references to:

Armin Gamper, Ph.D.
Department of Oncology
University of Alberta
Cross Cancer Institute
11560 University Avenue
Edmonton, Alberta T6G 1Z2
gamper@ualberta.ca

Closing date:
position open until filled

We thank all applicants for their interest; however, only those individuals selected for an interview will be contacted.

The University of Alberta is committed to an equitable, diverse, and inclusive workforce. We welcome applications from all qualified persons. We encourage women; First Nations, Métis and Inuit; members of visible minority groups; persons with disabilities; persons of any sexual orientation or gender identity and expression; and all those who may contribute to the further diversification of ideas and the University to apply.
