

You can log monitoring activities *only for studies that have already been approved.*

Go to the

- **My Studies** tab if you are a PI
- Or **ALL Studies** tab if you are a Vet, Chair, etc.

Click to select an approved AUP from the list.

The screenshot shows the 'REMO HOME PAGE' for a user named Yves Sauve. The 'My Studies' tab is selected and circled in red. Below the navigation tabs, there is a table of studies. One study is highlighted with a red box:

ID	Name	SmartForm	Date Modified	State	Expiration Date
Pro00028599	Choroideremia: expanding our understanding, exploring treatments	PM	6/7/2013 12:11	Pending Conditions	August 1, 2013
Pro00027538	Correlation of DNA/ERA blood levels with AMD progression among various genetically susceptible subgroups	PM	3/6/2013 12:17	Approved	January 8, 2014
Pro00035542	Microperimetry screening for hydroxychloroquine retinopathy	PM	2/25/2013 3:16	Changes Required by Delegated Reviewer	
Pro00032629	The short-term effects of emmetropia on the vision of males affected by choroideremia.	PM	1/30/2013 12:13	Approved	November 4, 2013
Pro00002108	ERG data for screening retinal	PM	1/7/2013 3:57	Approved	January 9, 2014
Pro00034917	Effect of naturally-occurring trans fats on beta-cell function and survival	PM	1/7/2013 2:49	Approved	December 4, 2013

Below this table, another table shows 'Animal Studies I set on track':

ID	Name	SmartForm	Date Modified	State
AUP00000776	Mechanisms of Chlorine Toxicity in Rainbow Trout: Effects of Hypoxia	PM	12/11/2013 11:52 AM	Approved - PAA Open
AUP00000328	Animal models of retina degeneration and therapies and Breeding Colony	PM	8/6/2013 10:40 AM	Approved - PAA Open

In the workspace of the AUP you selected:

- Click on the **PAM Log**
- Under My Activities click on “**Log Monitoring Activity**”

You can use this activity to log incident reports, report unexpected morbidity or mortality, interim progress reports, respond to other monitoring comments, etc.

Important: Logging a monitoring comment is **NOT** a substitute for submitting a Post-Approval Activity (PAA) (i.e., amendment, renewal or closing report) and does **NOT** affect the approval status of your AUP.

The screenshot shows the workspace for the study: 'Mechanisms of Chlorine Toxicity in Rainbow Trout: Effects of Hypoxia (AUP00000776)'. The 'My Activities' section has 'Log Monitoring Activity' circled in red. The 'PAM Log' tab is also circled in red, showing a log entry:

Activity	Author	Activity Date
Log PAM	Sauve, Yves	12/23/2013 11:30 AM MST

Pop-up Window for Logging a Monitoring Activity

When logging a monitoring activity, you can:

- a. write comments
- b. include attachments pertinent to your comments
- c. select people who should be notified of the comments

Note: The PAM Coordinator automatically receives all email notifications.

Log Monitoring Activity

Reason for Monitoring Report:

- Interim Progress Report
- Unexpected Mortality
- Unexpected Morbidity
- Veterinarian Round
- Facility Event
- EHS - Environment Health & Safety
- Other

PAM LOG

The PAM Log will show two kinds of information:

1. all monitoring comments logged on a study, and
2. institutional PAM reviews for a study

As the PI or Study Staff, you can see when a PAM Review has been opened and completed for your study, but you will **not** have access to the details of the information submitted by reviewers while the review is in progress. You will be able to review a summary report.

A PI will receive communication from the PAM coordinator or reviewer regarding any updates/changes that may be required as a result of the PAM review.

ACUC Chairs, reviewers, veterinarians, and ACUC Coordinators will have view-only access to an institutional PAM review.
