Job: Internship/Temporary/Seasonal Positions

Title: Red Squirrel Juvenile Technician

Location: Kluane Region, Yukon

Job Description: We are looking for 2-3 motivated and enthusiastic assistants to help with collecting behavioural and movement data on red squirrels as part of a long-term project. Tasks include trapping and tracking squirrels with radio-telemetry and conducting behavioural trials in the field. The position is extremely field intensive and takes place in the Yukon Territory.

Position will run from May 1 to August 31, 2018.

Interested applicants must be willing to apply to NSERC USRA or URI if eligible for supplemental funding.

To apply, please send a brief cover letter (indicating what tier you are applying for), CV with cGPA, and contact information for 3 references.

General requirements:
Outdoor experience
Ability to hike 15-20 km every day
Willing to work in all weather conditions

Tier #1 (NSERC) requirements:
Canadian citizenship
cGPA >3.5
Registered full-time in a bachelor’s degree

Tier #2 (URI) requirements:
Current and returning UofA bachelor student

Tier #3 requirements:
See general requirements

Assets:
Previous telemetry experience
Previous GPS experience
Driver’s license

Salary:
Tier #1: $1406/month and transportation from Edmonton, housing, and food included.

Tier #2: $1250/month and transportation from Edmonton, housing, and food included.

Tier #3: Transportation from Edmonton, housing, and food included.

Last date to apply: December 15, 2017, only those selected for interview will be contacted.
