Woodlands North, established in 2000, is a professional natural resource consulting firm offering field services to the forest and energy sectors. Woodlands has offices in Edmonton and Whitecourt, and operations throughout the province of Alberta. We are currently seeking motivated individuals to join our team in the capacity as field technicians. These positions are for a summer term, a practicum work term, with a potential for full time permanent pending a successful summer season. The following positions are available for the summer of 2018:

**Forest Technician:** candidates will be well versed with provincial legislation and current best management practices. Project duties include participation in silviculture and forest inventory programs with extensive field work consisting of project supervision and data collection.

**Ecology Technician:** candidates will have the ability to identify a wide variety of wildlife species by aural and visual methods. Wildlife inventories and species sampling includes: fisheries, songbirds, amphibians, remote camera work, pellet/browse surveys, nest searches, playback surveys, and winter tracking.

**Restoration Technician:** project duties include participation in seasonally active programs with extensive field work consisting of data collection and site prescriptions. Overseeing and reporting on programs for ecological restoration, vegetation and wildlife monitoring, and site preparation for reforestation will be common tasks.

**Creeks Technician:** candidates will be familiar with watercourse inventory and sampling techniques. Project work will consist of extensive field work conducting stream inventories and roadway watercourse crossing inspections. Some construction and creek restoration work takes place throughout the year as well.

These positions require strong written and verbal communication skills. Salaries are competitive based on level of experience, and education. Woodlands offers comprehensive benefits, continuing education, and a flexible work environment. Applicants must provide a valid class five driver’s license with a clean abstract. Shift work applies to all projects.

**Closing Date: November 17th, 2017**

Suitable applicants will be contacted prior to the closing date. Applicants may submit a resume and cover letter in MS Word or .pdf format.
