University Mathematics Primer Course
Monday to Friday 9:00 to 3:00 August 19th to August 30th, 2019.

Ease your transition from high school to university by refreshing your mathematics skills in a two week hands-on refresher course.

The University Mathematics Primer Course is a non-credit course offered to help you transition from high school to university. The course will refresh concepts studied in high school while in a setting similar to what you will be experiencing in September.

Most programs of study at the University of Alberta require a course in Mathematics. The University Mathematics Primer Course will help to ensure that your mathematics skills are where they need to be in order to succeed in your university mathematics courses. You will review topics including the real numbers, basic algebra, geometry, functions, exponents and logarithms, and trigonometry.

Students often find the transition from high school to university difficult. The University Mathematics Primer Course will help ease this transition by providing an environment similar to what you will experience in your first-year courses in September. There will be lessons presented each day in one of the larger lecture theatres on campus. The lectures will be followed up by breakout work periods where you will have the opportunity to practice what was presented in the lectures. In these breakout periods, you will work in small groups led by a Mathematics Graduate Teaching Assistant.

To register in the University Mathematics Primer Course, fill out the attached registration form and mail it with a cheque to the address provided. There are also credit card and ONEcard payment options available at the ONEcard website (select "Purchase", "Events" and then select the "Mathematics Primer Course"). If paying by credit card or ONEcard, please be sure to send in your registration information. The fee is $250, which will cover your registration for the course. Register early as space is limited.

Student testimonials from prior Mathematics Primer Courses:

“I haven't taken math for a year and a half so it was great to review.”

“I feel prepared to go into Math 113 and excited for it.”

“This [course] really helped to refresh my memory and clarify some concepts that I didn't really understand before.”

“Great course – a huge wake up call for those who are apprehensive towards taking a University Math course.”

“This course was an excellent idea and I'm glad it was available for me to take. I would be lost without all the reminders and tips.”
