- Open “printer and fax” and do check you have the printer in your selection.
- Download the drivers from Xerox. It should be Xerox drivers for MAC for Xerox 5655
- Install the drivers as the steps present itself
- Simplest way to enable the accounting tool is to open a document and hit print
- After which you will see this screen
- from the pull down menu of “copies and page”, select “Xerox Features”
- and in the drop down menu of “Paper/Output”, select “Advanced”
- Select "Accounting"
- Uncheck/check “Mask User ID” and Uncheck/check “Mask Account”, depends on how you would like to display your account code issued by Admin personal
- Enter your Account code from Admin personal in “default User ID”
