Why are you here?

Purpose of tonight’s open house: to provide our neighbours and other stakeholders an opportunity to review preliminary thinking around the Devonian Botanic Garden sector plan. Please provide your feedback and comments by filling out an evaluation form. University representatives are on hand to answer any questions.

Purpose of the Sector Plan

The university uses sector plans, in conjunction with the Long Range Development Plan, to assist future planning and development initiatives within each sector and determine if individual development or redevelopment projects are consistent with the directions and guidelines provided.

Long Range Development Plan

- Provides a flexible set of strategic planning principles that support the growth of new research, teaching and support facilities, as well as upgrades or replacement of existing structures.
- Identifies how university lands and facilities should be developed and outlines initiatives and guidelines that direct appropriate and effective growth and development within the university.
- Proposes the creation of sector plans for more detailed land use planning and design initiatives.

Sector Plan

- Identify potential development and redevelopment sites that address faculty, university services and other expansion requirements.
- Outline guidelines for effective and compatible development and redevelopment activities within and between each sector.
- Identify the required physical linkages to adjacent sectors and the interface with adjacent neighbours and university partners.
