Transportation Demand Management

Currently Thinking About...

- Relocation of main garden entry
- Highway 60 flexibility - Future plans for Highway 60 as it arises with the Province of Alberta and Parkland County
- Traffic Impact Assessment - Analyzing traffic generated by new development
- Prospector trail alignments

Responsive Strategies

- Substantial development projects to include Transportation Demand Management and Traffic Impact Assessment review
- New parking, satellite parking + shuttle buses
- Responding to Highway 60 change - Closure of existing entrance and relocation to south as agreed to with Province

What did we get right? What did we miss?
