

1. What program have you been admitted to?

On your BearTracks landing page, scroll down to the “Admissions” heading and click on “Application Status” to see which program you have received Admission for.

2. What courses should I register in?

- **BSc General:** Your program outline is available at: uab.ca/SciGeneralDegree. Select the course planning sheet in the right hand menu. We recommend you register for the junior core requirements in your first year of study. These 100-level courses are normally the pre-requisites for higher level science subjects and can be used towards professional programs.
- **BSc Specialization:** Locate your program curriculum in our registration guide at uab.ca/ScienceSpecialization. For most programs you are required to maintain a course load of *18-24 credits throughout the year. You are also required to maintain a specific GPA in order to stay in your program and remain in good standing.
- **BSc Honors:** Locate your program curriculum in our registration guide at uab.ca/ScienceHonors. For most programs you are required to maintain a course load of *24-30 credits throughout the year. You are also required to maintain a specific GPA in order to stay in your program and remain in good standing.
- **BSc/BEd Combined:** Visit uab.ca/BScBEd and select Chart 1. There are a total of 7 program combinations for the BSc/BEd combined degree. Scroll to the bottom of the University Calendar and locate your specific program combination for a list of courses.

Make sure to follow the curriculum of courses listed for the program you have been admitted to, and read the program requirements carefully.

3. What courses count as options to fulfill your option requirements for your Science degree?

Arts options: Courses offered by the Faculty of Arts, these are a diverse range of courses within Humanities, Social Sciences, Fine Arts and Language courses.

Science options: Courses offered by the Faculty of Science.

Outside options: Courses not offered by the Faculty of Science or Arts.

Approved options: Only applies to Specialization & Honors students. Students must seek permission from their Departmental Program Advisors before selecting their options. Visit the following link to locate your advisor: www.science.ualberta.ca/deptadvisors.

4. Tips for creating your ideal timetable.

Create a balanced timetable: Do not register for more than three lab based courses per term as you will have lab assignments and exams in addition to regular course work.

Do not register for a course if you do not have the pre-requisite: Students without the appropriate pre-requisites will be removed from the course. Make sure to read the course description before you register in a course on BearTracks.

The class you want is full: If a class is full simply place the class on your watch list (found on Beartracks). You will be notified via email or text message when a spot becomes available in the class.

5. Additional assistance.

Science online step-by-step registration guide: www.science.ualberta.ca/afteryouapply.

For additional questions contact a Faculty Recruiter at science.recruiting@ualberta.ca (while we will not register you in courses, we would be happy to provide assistance and answer your questions).
