| Executive Summary (outline the specific item – and remember your audience) | The repurposing and renewal of the Dentistry Pharmacy building was identified as an institutional priority capital project, to address significant building deficiencies, space use and asset management issues at the centre of North Campus. Five project drivers and deliverables are identified and supported:  
  - Facility and resource stewardship  
  - Space stewardship  
  - Administrative effectiveness and efficiency  
  - Academic / Institutional branding and recruitment  
  - Campus crossroads and student life  

  The project implementation is divided into two specific phases, the core and shell phase (this submission) and the programming and occupant fit-out phase (future submission). This strategy was necessary due to building decant logistics and funding cash flow profiles.  

  This schematic design report summarizes planning and design explorations to date regarding the core and shell phase, including a detailed examination of the conditions and viability of adaptive reuse of the historic structure. The report culminates with a recommendation to retain the 1922 wing and to demolish the 1946, 1947 and 1958 wings, (consistent with the sector plan), with a preferred option recommendation for the design and construction of a new north wing.  

  Preliminary programming space categories were developed to include University and public realm, student success, special character, general office and support services. |
The result will be a transformation of a prized piece of University of Alberta history into a new campus crossroads, centrally located, easily accessible to the university community, a porous public realm with a presence on 89 Ave Students Blvd, supporting student success and connected to the rest of the campus in geography, history, purpose and meaning. It is an overdue operation to give this treasured building a second life – to serve as a welcoming front door and a main stage of the University on North Campus.

Construction activities will begin in April 2019.
